Fig 2

The image shows a screenshot of a software dialog box titled "Filter TL1 Event". The dialog box is divided into several sections. At the top, there is a "Find NE ID" section with a label "NE ID", a dropdown menu set to "Starts With", and a text input field labeled "Value". Below this is a checkbox labeled "Case Sensitive" which is checked. The next section is "Event Types", which contains a grid of checkboxes: "Unparsed", "Received Raw", "Response", "Send Raw", "Command", "Autonomous", and "Acknowledgement". All of these checkboxes are checked. At the bottom of the dialog box are five buttons: "OK", "Cancel", "Select All", "Clear All", and "Help". Handwritten annotations are present: a squiggly line labeled "60" points to the top right corner of the dialog box; a squiggly line labeled "64" points to the "Case Sensitive" checkbox; and a squiggly line labeled "62" points to the "Acknowledgement" checkbox.
